

PurAire MiniPro-1

Bipolar Ioniser for Guest Rooms, Toilets, Clinics

Treatment Area up to 40 SqM

Product information

Air volume	80 m ³ /h
Treatment area	20-40 m ²
Shell material	Aluminium Alloy
Weight	1.4 kg
Product size	180 × 100 × 240 mm
Noise	≤ 50 dB
Filter type	None

Electrical

Voltage	220 VAC, 50 / 60 Hz
Power consumption	7 W

Ionisation tube

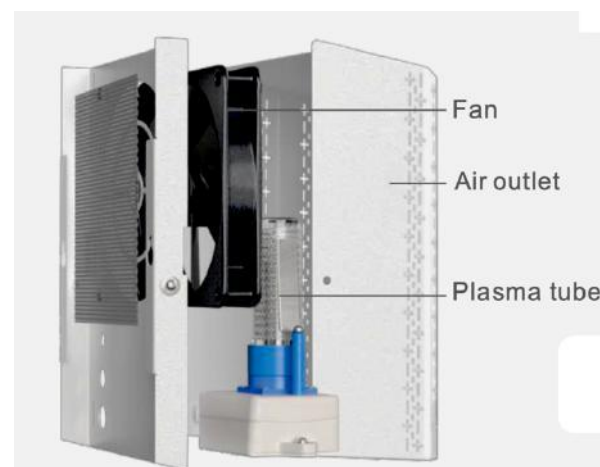

Quantity	1 Glass DBD bipolar ionisation tube
Size	80 mm
Estimated tube life	17,000 hours

Warranty

Warranty	2 Years Unit, 1 Year Ionisation Tube

Fragrance dispensers are ineffective. They simply try to mask those smells. They don't eliminate those urine and body odours from your toilets and require constant replenishment. Our MiniPro-1 replaces those dispensers with bipolar ionisation that effectively removes those odours.

The PurAire MiniPro-1's Bipolar Ionisation unit is designed to be wall mounted in your toilet, clinic or guest room to quietly eliminate those odours, including Ammonia, and Hydrogen Sulphide, tobacco and foods. The output control allows you to adjust the ionisation level as needed to neutralise them.

The airflow over the ionization tube produces powerful bipolar oxygen ions that flow into the space and saturate the indoor space with the ions providing constant and effective purification. The MiniPro-1 provides continuous odour elimination without the need for fragrances or those wall mounted dispensers.
