

PurAire MiniPro-2

Bipolar Ionizer for Guest Rooms, Toilets, Clinics

Treatment Area 50 to 80 M²

Product information

Air volume	Up to 460 m ³ /h
Treatment area	50-80 m ²
Shell material	Aluminium Alloy
Weight	8.7 kg
Product size	425 × 125 × 320 mm
Noise	≤ 50 dB
Filter type	HEPA (optional)

Electrical

Voltage	220VAC, 50/60 hz
Power consumption	72W

Ionisation tube

Quantity	2 Glass DBD bipolar ionisation tube
Size	180 mm
Estimated tube life	17,000 hours

Warranty

Warranty	2 Years Unit, 1 Year Ionisation Tube

MiniPro-2 Installed in Toilet

Fragrance dispensers are ineffective. They simply try to mask those smells. They don't eliminate those urine and body odours from your toilets and require constant replenishment. Our MiniPro-2 replaces those dispensers with bipolar ionisation that effectively removes those odours

The MiniPro-2's Bipolar Ionisation unit is designed to be wall mounted in your toilet, clinic or guest room to quietly eliminate those odours, including Ammonia, and Hydrogen Sulphide, tobacco and foods. The output control allows you to adjust the ion level as needed to neutralise them.

The air flow over the ionization tubes produces powerful bipolar oxygen ions that flow into the space and saturate the indoor space with the ions providing constant and effective purification. The MiniPro-2 provides continuous odour elimination without the need for fragrances or those wall mounted dispensers
