

PurAire LiftPro-2

Bipolar Ioniser for Larger Lifts or Spaces up to 50 SqM

Product information

Air volume	60 m ³ /h
Treatment area	50 m ²
Shell material	Aluminium Alloy
Weight	1 KG
Product size	260 × 175 × 60 mm
Noise	≤ 50 dB
Filter type	None

Electrical

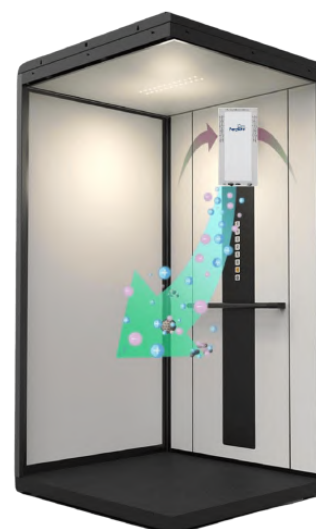

Voltage	12 or 24VDC
Power consumption	7W

Ionisation tube

Quantity	1 Glass DBD bipolar ionisation tube
Size	80 mm
Estimated tube life	17,000 hours

Warranty

Warranty	2 Years Unit, 1 Year Ionisation Tube
----------	--------------------------------------

Typical Installation inside a lift

The PurAire LiftPro-2 is designed for applications such as larger elevators or service lifts, freight lifts and other enclosed spaces with heavier occupant turnover. It is designed to replace the wall mounted fragrance dispensers that simply try to mask those smells.

The PurAire LIFTPRO-2's Bipolar Ionization unit mounts permanently inside the lift or room and provides continuous bipolar ionisation to help reduce and eliminate persistent body, food, tobacco and musty odours.

The 60 CMH airflow through the LiftPro-2 flows over the ionization tube and produces powerful bipolar oxygen ions that flow into the space and silently saturate the space with those ions providing constant and effective air purification.
